

Notice: Amendment of forecast for fiscal year ending March 31, 2011 (the 46th year)

In the board members meeting held on October 29, 2010, the board has decided to amend the forecast to include a dividend as follows:

1. The reason for amending the forecast to include a dividend

We recognize that returning profit to our shareholders is one of the most important policies in management, and we are actively working to execute proper profit sharing based on business results. But, because of the rapid changes in the economic environment, triggered by the financial crisis in the United States, we have recorded a loss for four straight years, including fiscal year 2010. When planning the forecast for fiscal year 2010, we decided to forego forecasting a dividend since we believed the state of the global economy would continue to be uncertain. However, in light of the business result of this fiscal year to date, we are planning to revive the dividend for this fiscal year end. The amount of dividend has not been decided at this point in time, but a notice will be posted as soon as it is decided.

2. Contents of amendment

Annual Dividend (JPY)

	Q1 & Q2	Q3 & Q4	Total
